

Responsible Research and Innovation **IN ACTION**

Going Global: international perspectives on responsibility

Dr Rajesh Tandon

**UNESCO Chair in community-based research and social
responsibility in higher education**

www.pria.org; www.unescochair-cbrsr.org

UNESCO Chair in Community-based Research and Social Responsibility in Higher Education

North-South Partnership:

- Rajesh Tandon, Co-Chair, Society for Participatory Research in Asia (PRIA) located in New Delhi, India
- Budd Hall, Co-Chair, Community Development, School of Public Administration and Centre for Global Studies, University of Victoria, Canada
- In cooperation with a global network of partners including the NCCPE and many others

Building support and capacity through:

- Capacity-building and training in community-based research – ‘NextGen’
- Organisational structures for facilitating community university partnerships
- Policy development and advocacy

Co-construction of Knowledge

- 95% of respondents make this as key priority
- Yet, only 15% of research questions come from community
- Different meanings of co-construction conflate
- Public representation of findings most critical missing link

CURP: Research Partnerships

- 60% report some structure
- Interface mechanism essential for partnerships
- Student & faculty outreach more than community ‘inreach’
- Different knowledge cultures and weak capacity on both sides

Capacity for CBR in Next Gen

- Most had no training in Community-based Research (CBR)
- Classroom training without field interactions: praxis?
- Values, ethics and power not taught in CBR
- High demand for practical training in local contexts

Asian Trends & Questions

- Scientists only interact with peers, opaque
- Gender inequality, discrimination, gap in research institutions
- Race for ranking limiting open access
- Public relevance & accountability of research under scrutiny
